20th Anniversary

Surgery of the Foregut Symposium

8th Congress of the International Society for Fluorescence Guided Surgery

www.ccfcmecme.org/Foregut2023

Feb 20-21, 2023

The Biltmore Hotel | Coral Gables, Florida

Registration is Open

SYMPOSIUM HIGHLIGHTS

The 2023 scientific session features a full day focusing on the 8th Annual Congress of the International Society for Fluorescence Guided Surgery (ISFGS), under the leadership of Drs. Raul Rosenthal and Fernando Dip. Expect innovative and updated information from key leaders in the field of fluorescence guided surgery.

Day two is devoted to the 20th Annual Surgery of the Foregut Symposium. The return of the expert guest faculty promises the most current information and approaches to the management of bariatric and metabolic disorders.

Raul J. Rosenthal, MD, FACS, FASMBS
Activity Director
Professor of Surgery
Chairman, Department of General Surgery
Director, Bariatric and Metabolic Institute
Cleveland Clinic Florida

R. Matthew Walsh, MD, FACS
Co-Activity Director
Professor of Surgery
Chairman, Department of General Surgery
Digestive Disease & Surgery Institute
Cleveland Clinic

By Attending, You Will Be Able To:

- Analyze new surgical treatment options for intestinal failure
- Analyze the indications, technical pitfalls and outcomes of anastomotic procedures
- Demonstrate the surgical approaches to diaphragmatic and abdominal wall hernias
- Determine how to recognize hiatal hernias, review technique of recurrent hiatal hernias repair using bared sutures, and present complications of repair
- Evaluate new approaches to Foregut disorders, analyze new techniques, and present technical pitfalls of re-operative foregut surgery
- Examine the basic concept of fluorescent imaging techniques and alternative fluorescent dyes, and discuss different applications of fluorescent imaging
- Examine the current standards for technical performance of various methods of primary bariatric procedures and what are the long-term outcomes
- Explain the current epidemiological data and trends of Gastroparesis, discuss best non-surgical treatment modalities, and analyze the outcomes of most common surgical approaches
- Explain the most common re-operative approaches, technical pitfalls of re-operative surgery of the pancreas and biliary tree and discuss how to identify and manage most frequent complications
- Identify technical pitfalls when repairing recurrent ventral hernias, familiarize with alternative approaches to ventral hernia repair, and review mesh utilization when performing laparoscopic vs. open repairs
