Welcome to the Johnson & Johnson Institute

Today's dynamic environment continues to impose unprecedented challenges on healthcare systems around the world. This includes not only patient care, but also education and training for healthcare professionals globally including the demand for bariatric surgical education.

Johnson and Johnson institute are honored to invite you on June 18th to the first Middle East Virtual in Hospital training with **Proximie**, a newly adopted facilitation technology, followed on the same day with the Bariatric Surgery Discussion in Times of covid-19 with experts from all over the region around the table. The day is split into 2 sessions, a virtual in hospital training from Najjar Hospital, followed by an expert panel discussion with a Q&A session. I wish you a very instructive event.
