

### Contributors

Following the success of the IFSO Pilot Global Registry and subsequent expansion of the number of contributors (and the publication of the Second Global IFSO Registry Report at the IFSO congress in Rio de Janeiro in 2016), Dr Kelvin Higa, the President of IFSO, invited all IFSO members to join the registry. This year there are now more contributors than ever before, and the table spread across these two pages shows exactly which countries, in which continental region, were successful in submitting data either as national registries or as individual centres.

Contributors

Contributors to the IFSO Global Registry

		<b>Operations</b>	<b>Data source</b>
<b>Europe</b>	 Belgium	8,163	Single centre
	 Czech Republic	1,319	Single centre
	 France	2,720	Multi-centre
	 Georgia	110	Single centre
	 Germany	471	Single centre
	 Hungary	52	Single centre
	 Ireland	503	Single centre
	 Italy	2,398	Single centre
	 Lithuania	67	Single centre

	 Poland	259	Multi-centre
	 <b>Russia</b>	3,346	<b>National registry</b>
	 Spain	709	Multi-centre
	 <b>Sweden</b>	34,244	<b>National registry</b>
	 Switzerland	5,050	Multi-centre
	 <b>Turkey</b>	2,067	<b>National registry</b>
 <b>United Kingdom</b>	56,168	<b>National registry</b>	
<b>N America</b>	 Canada	2,143	Multi-centre
	 Mexico	1,677	Multi-centre
	 United States of America	5,197	Single centre
<b>C America</b>	 Guatemala	51	Single centre
	 Panama	96	Single centre

A complete list of all the hospitals/clinics that have submitted data on a country-by-country basis, is available in the Contributors section of this report on pages 58-65. Some of the established national registries were able to submit the totality of the data that they had collected over the years, while others were only able to submit data spanning one or two years. Notably Brazil has just commissioned a new National Registry, which is currently running in a limited pilot-mode and once this test phase has been completed, the registry will roll out across the country. As a consequence the hospitals listed as contributors for Brazil this year represent only the pilot centres.
