

The Future of Obesity Treatment

An International Multidisciplinary State of The Art Update

Dear Colleagues

Obesity and its consequences are set to become one of the most important health care issues of the next few decades. Neither public health policy nor the available medical treatments have been able to consistently address the obesity epidemic, which continues to affect patients' health, quality of life and the wider impact on society. We believe that the challenge needs to be addressed through a multidisciplinary approach involving and promoting collaboration across different specialities including physicians, surgeons, policy makers, commissioners and managers.

"London 2012: The Future of Obesity Treatment" aims to review the current status of obesity treatment and to discuss how best to address the challenges in the future.

We are privileged to have the world's leading authorities to address this challenging topic and we aim to make the meeting as interactive as possible with expert panel discussions and a final debate on the different treatment options.

The meeting is open to general practitioners, surgeons, physicians, diabetologists, endocrinologists, gastroenterologists, endoscopists, commissioners and managers, all of whom face their own specific challenges in this evolving field. Our invitation is also extended to trainees and allied health care professionals involved in the specialist management of patients suffering from obesity.

We are delighted to invite you to attend this state of the art International Symposium on February 3rd 2012 at the Royal College of Physicians in London.

Gianluca Bonanomi, MD, FRCS

Consultant Surgeon
Symposium Co-Director
Chelsea and Westminster
NHS Foundation Trust
London, United Kingdom

Carel le Roux, PhD, MRCP

Reader in Metabolic Medicine
Symposium Co-director
Imperial College London
London, United Kingdom

Bobby Prasad, FRCPI

Consultant Gastroenterologist
Symposium Co-Director
Imperial College London
NHS Foundation Trust
London, United Kingdom

The International Symposium is endorsed by:

08:30 –09:30

Coffee/Registration

09:30 –09:40

Welcome Address and Introduction

Mr Gianluca Bonanomi, Chelsea and Westminster Hospital London

09:40 –10:00

How will the International Diabetes Federation statement change the future?

Prof Sir George Alberti, University of Newcastle/Imperial College London

MORNING SESSION: THE MEDICAL APPROACH TO OBESITY

Chairs: James Ahlquist (Royal Society of Medicine), Michael Feher (Chelsea & Westminster)

10:00–10:20

Obesity: What is the challenge for the community?

Dr David Haslam, Chairman, National Obesity Forum

10:20–10:40

Which patients stand to gain most from obesity treatment?

Dr Simon Aylwin, King's College London
