Obesity Update provides the ideal forum to share cases and experiences with peers. Sharing your interesting or challenging cases will help others advance their understanding of obesity and could have a significant impact within the field.

For full programme and registration details see [www.obesityupdate.org](http://www.obesityupdate.org).

**PROGRAMME**

This comprehensive update will cover a range of topics based on the clinical treatment of obesity, including:

- A year in review
- Complex clinical cases in obesity
- Plenary talks on:
  - Corpulence as a disease: from Hippocrates, to ‘the other’ William Harvey and to today
  - The neurology circuitry of appetite
- Updates on commissioning guidelines
- Debate: In the year 2030 pharmacotherapy will replace bariatric surgery?
- Obesity in pregnancy
