

Message from the President

Kelvin D. Higa
President of IFSO

Creative abrasion

What is IFSO? Why do we have a World Congress? Why should you participate? The next World Congress will take place in London and the scientific program engineered by BOMSS, Richard Welbourn, Cynthia Borg and Wendy Brown is nothing short of spectacular.

The first IFSO I attended was in 2000 in Genoa, Italy. It was at this meeting that I met for the first time individuals such as Nicola Scopinaro, Robert Brodin, Rafael Capella, Charlie Miller, Henry Buchwald and many others who would not only become lifelong friends, but who would become my mentors and help guide my career.

Over the years, I have come to appreciate the wealth of information, the degree of innovation and the camaraderie displayed only at the IFSO World Congress. For those of you who have never attended an IFSO World Congress, this is your chance!

What is the purpose of IFSO. IFSO was born at time of few bariatric surgeons, from a few countries with the idea that dissemination of ideas and data would help to find the answers to some fundamental questions such as how do our operations work? What is the best operation? Why do less than 1% of eligible patients opt for surgery?

Today, although we are still struggling with these questions, and universal coverage is still only a dream, bariatric/metabolic surgery has become a respected specialty reaching all parts of the world. IFSO's role, directly and indirectly, should be acknowledged, even though we have a long way to go. The founders and past leaders of IFSO should be commended on this great achievement.

IFSO World Congress is the one time where every Society, from every country, can unite and can create resolutions that transcend individual politics and dogma. Human rights, dignity, access to medical care and standards of practice should be universal, independent of the GDP or inherent prejudice of individual policy makers. Yet, IFSO should not embody the concepts of compromise for the sake of collaboration or ignore the collective genius that exists within our membership.

Message from the President

Conflict is an important part of the process that leads to collaborative problem solving. We as leaders must embrace conflict rather than avoid it. Disruptive ideas lead to innovation. This is different than disruptive behavior surgeons are known for. Disruptive behavior is infantile at best and impedes progress. The fathers of IFSO knew they could not script a blueprint for an emerging Federation that would transcend time in a changing world. Their vision was to create the ability to discuss, argue, and then finally resolve issues knowing that compromise is not the key to success; it is the active interaction and open exchange of ideas that can lead to greatness.

As an example, the International Bariatric Club (IBC) will often use this friendly pro/con banter to illustrate a point; left to the individual surgeon to come to a conclusion. This is not only entertaining, but also quite educational. However, the leadership of IFSO must ensure that all opinions are to be heard with weight given by experience and scientific method, not just anecdotal rhetoric.

As Linda Hill, the Wallace Brett Donham Professor of Business Administration at Harvard Business School and author of the book: *Collective Genius: The Art and Practice of Leading Innovation* stated: "The role of leadership is to set the stage, not perform on it."

I invite all of you to come to the World Congress in London this year; not just to hear great didactics, but more importantly, to actively participate in collaborative problem solving, discovery driven learning and integrative decision making that necessarily involves every member of IFSO. We are IFSO.

Kelvin Higa

IFSO President

Dr. Kelvin Higa (IFSO President) with Dr. Richard Welbourn (IFSO 2017 Congress President)

European Chapter Report

Michel Suter
President of
European Chapter

During the last few months, our Executive Board and Scientific Committee worked mainly on the organization and programming of the first bi-annual "chapterized" symposium of the IFSO European Chapter, presided by former IFSO president, Prof Luigi Angrisani, which will take place in Naples May 11-13th this year.

The symposium will include a full day (Thursday) session of live surgical procedures performed by various experts, intertwined with a talks on topics related to the cases presented in the operative rooms. Friday and Saturday will be dedicated to plenary and video sessions, as well as poster presentations.

A full IFSO symposium, chaired by IFSO's president Prof Kelvin Higa, will be dedicated to the best Obesity Surgery's publications from the European Chapter. A medico-surgical session, organized in partnership by IFSO-EC and EASO will tackle the mechanisms for weight loss and weight maintenance. This session will be repeated during EASO's annual congress in Porto later this year.

Other main topics will be safety in bariatric and metabolic surgery, the role of the multidisciplinary team in multimodal weight management therapy, long-term (10-year or more) results of bariatric/metabolic surgery and comparative studies, among others. The international bariatric club as well as Young IFSO will each organize one session. Finally, one MOSS/GOSS session on Saturday will include discussions about the current status of and future projects of bariatric / metabolic surgery in Middle East, North Africa and Mediterranean countries. Over 150 abstracts have been received for this Symposium.

Everyone interested in bariatric/metabolic surgery, IFSO member or not, Chapter member or not, is welcome to attend this Symposium and enjoy not only high quality scientific presentations, but also the charms of Italian lifestyle, cuisine and hospitality in the magnificent city of Naples with nearby world renown Vesuvio, Amalfi coast and Island of Capri.

Three scholarships will be awarded to young surgeons with special interest in bariatric/metabolic surgery.

European Chapter Report

Collaboration with EASO will be pursued in the coming year by regular meetings between respective board members and with the organization of common sessions during annual congresses of each Society. The next common session will take place during our bi-annual congress in Athens next year (May 17-19th 2018).

Work on the IFSO-EC website is progressing thanks to the hard work of both our Communication and Development Committee lead by Juan Pujol Rafols and his team in Barcelona, together with our PCO in Prague, and we hope to be able to present our new Picture&Video Gallery platform later this year, maybe during the Naples Symposium....

Recently, on request from one of our member national Society facing difficulties regarding with acceptance (as a specialty) and coverage of bariatric surgery with the local authorities, a letter was sent to the Ministry of Health of this country in order to support the development and coverage of bariatric and metabolic surgery. This letter was signed both by Prof Higa, President of IFSO, and by Prof Suter, President of the Chapter. Our support included a suggestion to organize a symposium in this country, with official participation of a delegation from IFSO / IFSO-EC, with the goal to inform all local stakeholders about the importance of our specialty and its positive effects on health, health economy, etc...

Please join us at IFSO-EC 2017 Symposium in Naples, Italy.

The Scientific Programme is now available at www.ifso-ec2017.com.

Its main topics include:

- Metabolic mechanisms of surgeries, gut microbioma and bile acids
- Metabolic surgery and NASH
- T2DM: Surgical Options and Long-term Outcomes
- Management of weight re-gain and co-morbidities development
- Sleeve gastrectomy and gastric bypass
- Sadi's, Gastric plication
- Innovative robotic procedures
- Endoluminal and experimental procedures
- Revisional surgeries
- Safety and training in bariatric and metabolic surgery
- Integrated health session
- Multidisciplinary approach
- Class 1 Obesity without comorbidities – is there a place for weight loss surgery?
- Long-term outcomes (> 10 y) for traditional operations

Our online registration desk is Open! Take advantage of the early-bird deadline. Register today to attend Canadian Obesity Weekend. [Click here](#) to register online.

North American Chapter Report

PRE-CONFERENCE WORKSHOP ON DUODENAL SWITCH

ICCDS 2017 will kick off Canadian Obesity Weekend with our Pre-Conference Workshop on Duodenal Switch. The scientific content of this workshop allows delegates to hear from 15 renowned international leaders as they share their expertise on DS and its variants. The program will feature 8 live surgeries by high caliber operators from around the world. Delegates will be able to “Meet and Greet the Faculty” during our Wine & Cheese Reception. [Click here](#) to review the two-day program.

CABPS & IFSO NAC CONFERENCE

The Canadian Association of Bariatric Physicians and Surgeons (CABPS) and IFSO North American Chapter join forces to host a two-day event that will begin on day two of this joint Conference with a heavy focus on “Metabolic Benefits of Bariatric Surgery and Medicine.” We will focus on weight re-gain, diabetes and microbiota, as well as the larger picture (including needs assessment in bariatric care, improving access to care in bariatric surgery and, as always, best practices). Bariatric medicine and surgery take a holistic approach, considering the role of patient psychology and the patient’s support system as well as surgery and direct medical interventions. Attend to learn from world renowned leaders in our field. [Click here](#) to view our Conference Program.

SOCIAL EVENTS

Join us for our Meet The Faculty Wine & Cheese Reception on Thursday and our President's Cocktail Reception on Friday for an evening of simple elegance and sophistication. You will have the pleasure of an exceptional view overlooking the majestic waterfalls – you will be mesmerized by its beauty. It is the perfect atmosphere for you to feast and network with colleagues. It's just the right setting to enjoy the camaraderie among friends. You can't afford to miss it! [Click here](#) to learn more. See you there!

SPA SERVICES

Looking for a place to relax and unwind after a long day of sessions? Christienne is the only Spa in the World to feature treatment areas and a Relaxation Lounge directly overlooking the majesty of Niagara Falls and is the only Spa in Canada to offer a Hydrotherapy Infinity Tub. Your journey to serenity starts at Christienne Fallsview Spa at the Sheraton on the Falls. The Christienne Fallsview Spa is located on the 14th Floor of the four diamond Sheraton on the Falls Hotel. To book your treatment, please call: [1-905-374-4446 ext. 4555](tel:1-905-374-4446) or contact the spa by email at christiennespa@niagarafallshotels.com

North American Chapter Report

June 8 – 10, 2017

San Diego, CA

ASMBs Weekend offers an exceptional learning experience for every role on the bariatric team by integrating obesity treatment, research and advocacy throughout the meeting. Through this 3-day conference, attendees will have the opportunity to earn over 20 CME, MOC and CE educational hours.

[Click here](#) to register today.

ASMBs Weekend Program Highlights

ASMBs Weekend provides essential courses for all professions involved in obesity treatment.

Surgeons

This category includes all surgeons, osteopaths, endocrinologists, anesthesiologists, bariatric physicians, pediatricians, geriatricians, gastroenterologists and any other physicians.

North American Chapter Report

Weight Recidivism: Under the direction of Dr. John Magaña Morton along with Dr. Samer Mattar and Dr. Rachel Goldman, attendees will develop an understanding of the underlying mechanisms for weight regain.

Bariatric Endoscopy: Attendees will understand the endoscopic “normal anatomy” of bariatric procedures, how to use endoscopy to manage bariatric complications, and procedures approved by the FDA.

Main Event - Surgery from A-Z Tips and Tricks: Attendees will receive an overview of all major bariatric surgical procedures and suggested techniques for optimal outcomes, and gain an understanding of new prevention techniques.

Spectacular Cases/Video Session: Attendees will view unique cases and understand new techniques to address individualized therapies and techniques.

Stump the Experts: All you want to know and never dare to ask or discussed. Attendees will engage in Q&A and group discussion, learning how to handle difficult cases, doubts on treatment options, and controversial treatments and techniques.

Practice Management: This course will help attendees understand overall guidelines to developing a successful private or academic practice. It'll examine how to incorporate pharmacology, endoscopy, and new technologies into their practice.

Mexican College of Surgery for Obesity and Metabolic Diseases: What's happening Outside the US: (Course presented in Spanish) Attendees will understand the various approaches and procedures that are trending outside of the United States, understand strengths, weaknesses, and complications of Medical Tourism and trends in Bariatric Surgery for Low BMIs and metabolic approaches.

Integrated Health

This category includes all supporting positions in Bariatrics – Behavioral Health, Pharmacology, Nutrition, Diet, Nursing, Physician Assistants, Psychiatrists, Bariatric Coordinators, and other support staff.

North American Chapter Report

Perioperative Care of the Bariatric Surgery Patient: This course provides an overview of the perioperative care provided before surgery. Topics include medication absorption changes after bariatric surgery, nutritional recommendations, and substance use issues.

What is the Latest and Greatest: This session explores the latest and greatest technologies for bariatric surgery. Attendees will also learn how to incorporate social media in their practice.

Case Studies/Networking Session: This educational activity will present and discuss complex bariatric surgery case studies examined by providers of different disciplines.

Weight Recidivism: Attendees will understand the role of the multidisciplinary team and the best practice to treat weight regain after bariatric surgery.

Take-Home Pearls: This course is designed to provide integrated health professionals with tools to develop a successful practice. At the completion of this course participants will be able to develop strategies for enhancing their practice and interactions with their patients.

CBN Review Course: This review course is designed for licensed Registered Nurses (RN) who have been involved in the nursing care of patients with obesity, for a minimum of two years, and are preparing to take the Certification Exam.

Latin American Chapter Report

Juan Antonio Lopez
Corvala
President of Latin
American Chapter

Guatemala, March 18th. 2017

Juan A. López-Corvalá MD FACS FASMBS
President IFSO LAC

Letter to the President by Dr. Estuardo J. Behrens

Dear Dr. López Corvalá,

On behalf of the Board of the Latin American Chapter of IFSO, it is my pleasure to report to you what are the main achievements of our Chapter, in the last 5 months, from November 2016 to March 2017. This is going to be the last IFSO LAC REPORT that I make to you, because on April 28th. 2017 Dr. Ricardo Cohen will assume the IFSO LAC Presidency. It has been a pleasure to work with you Dr. López-Corvalá:

1) We have had 4 communications with our member societies, as e-mail communications. Our Whatsapp CHAT IFSO LAC has been effective as always, new Presidents from our Member societies have already assumed in their countries, Caetano Marchesini from Brasil, Salvador Navarrete from Venezuela, Ramiro Carbajal from Perú, Héctor Herrera from Paraguay and Ricardo Peña from Honduras, because of this transition we keep the past Presidents in our Chat to have a better follow-up.

2) During these last 5 months we have been working together with Dr. Sergio Aparicio in the advances of the organization of the VII IFSO LAC Congress, that will held in the beautiful city of Santa Cruz de la Sierra, Bolivia, from April 26th to 29th 2017. Everything has been accomplished for this meeting. More than 35 International Speakers, several Pre and Transcongress courses had been organized, Dr. Aparicio has a strong power of convocation. We will have a great Congress!

A LA BREVEDAD

**VII CONGRESO LATINOAMERICANO
DE CIRUGÍA BARIÁTRICA Y METABÓLICA
IFSO LAC**
26 a 29 de abril de 2017 | Santa Cruz | Bolivia

Latin American Chapter Report

All the Presidents of the IFSO LAC Member Societies made a commitment with Bolivia to have a great meeting in April. During the World Congress of IFSO in Rio de Janeiro we had an IFSO LAC booth, we have had several surgeons, students and Allied Health interested in our next meeting. By now, everything is ready for our VII IFSO LAC CONGRESS in Santa Cruz de la Sierra, Bolivia, from April 26th. to 29th. 2017.

We have been working hard, promoting the VII IFSO LAC Congress.

Latin American Chapter Report

3) As you know Mr. President, the last World Congress of IFSO was developed in Rio de Janeiro, at the end of September 2016. On September 29th. 2016 we had our last IFSO LAC General Assembly, in which Dr. Ricardo Cohen has been elected as the President-elect of IFSO LAC 2017-2019. Dr. Cohen will assume the Presidency on April 28th 2017 in Santa Cruz de la Sierra during the VII IFSO LAC Congress. 11 countries of IFSO LAC were represented during this Assembly.

Latin American Chapter Report

FRANKFURT, November 2016

Sharing time with the Master Scopinaro

Latin American Chapter Report

Dr. Kelvin Higa (IFSO President), Dr. E. Behrens (IFSO LAC) and Dr. Ramón Vilallonga (IFSO-EC) in Frankfurt am Main, Germany.

Dr. Rudy Weiner's meeting was a real success, the conference was very well attended from Surgeons and Allied Health. Thank your Rudy and Sylvia for your Hospitality.

Dr. Weiner is opening the Congress, with an outstanding speech.

Latin American Chapter Report

Dr. Estuardo Behrens talking about What to do When the Sleeve Fails.

In Frankfurt, not everything was Academic, the social program was excellent, we felt at home.

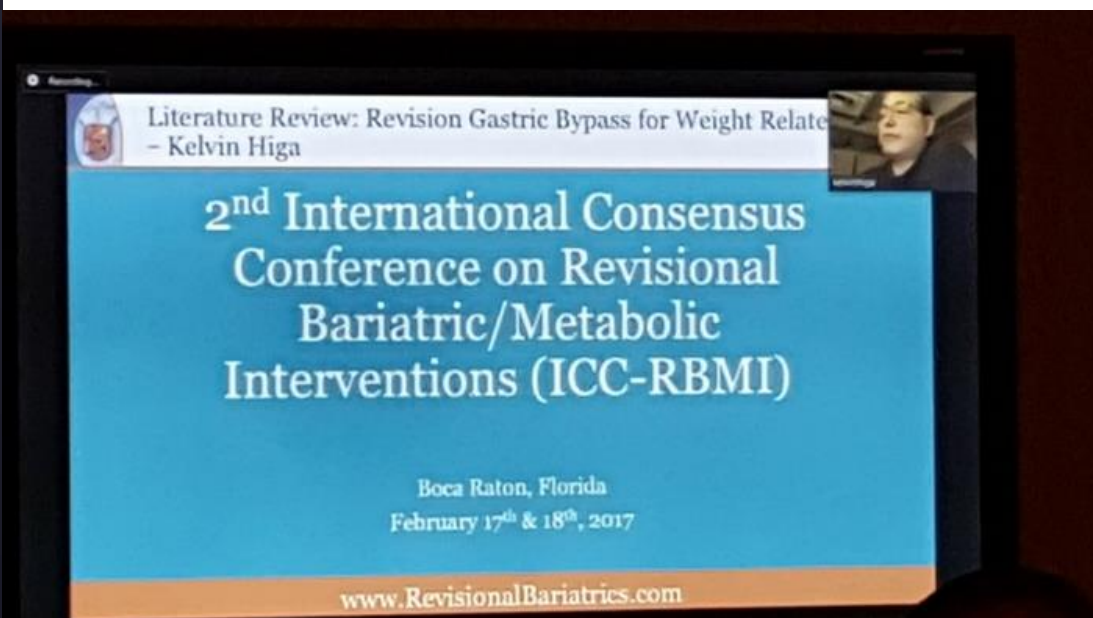

Latin American Chapter Report

DDI WEEK 2017, Boca Ratón, Florida, USA.

From February 15th. to 18th. in Boca Ratón, Florida it was developed the 16th. Foregut Symposium PLUS the 2nd. International Consensus on Revisional Bariatric and Metabolic Interventions. All the Chapters of IFSO were represented.

Latin American Chapter Report

Conferences and discussions were developed during this 2 days meeting.

Latin American Chapter Report

Dr. Higa was away, on his daughter's wedding, BUT HE WAS PRESENT.

A nice modality of interacting and voting was developed during the Consensus.

Latin American Chapter Report

Hospital Ángeles del Pegregal, México

I International Course for Bariatric and Metabolic Surgery plus Allied Health, Colegio Mexicano de Cirugía para la Obesidad y Enfermedades Metabólicas (CMCOEM), together with the Hospital Ángeles del Pedregal, México, March 7th. To 11th. 2017.

Dr. Estuardo Behrens, Dr. Jesús Montoya and Dr. Ricardo Blas (Organizers)

Latin American Chapter Report

Dr. Rafael Alvarez-Cordero (Past-President IFSO) was the main organizer of this I International Course of Bariatric and Metabolic Surgery with an Interdisciplinary approach, almost 300 professionals attended the meeting.

Well Mr. President, this is all what have happened in the last 5 months of work here in IFSO LAC. God Bless you.

Sincerely yours,

Estuardo J. Behrens MD MACG FACS FASMBS

Asia Pacific Chapter Report

Dear Friends,

It is a great pleasure for us to invite you to IFSO APC 2017 which will be held in April 2017, in Goa, India.

It will be our honor and privilege to welcome members from all over the world to attend this very special scientific event. The disease of obesity has been growing tremendously and we need to educate and interact with the medical fraternity about the scientific ways to treat it.

The IFSO APC will offer an international view on the state-of-the-art treatments for obesity and diabetes, addressing all the advancements and challenges in this field. The scientific program will include Post-Graduate courses, Surgical workshops, Oral and Poster presentations, Hands on lab, Integrated Health sessions, symposia and hot topic debates.

We look forward to meeting you in Goa to combine the highest level of science with the typical Goan lifestyle and the warmth of our Indian Chapter.

IFSO APC 2017- Goa, India

HANDS ON CADAVER BARIATRIC WORKSHOP

Date - 24th April, 2017
- Venue -
M. S. RAMIAH ADVANCED LEARNING CENTRE BANGALORE

Agenda	Course Directors	Faculty
Restrictive Procedure-Sleeve Gastrectomy	Dr. Lilian Kow	Dr Arun Prasad
Mal absorptive Procedure- Gastric Bypass	Dr. S. Shah	Dr Nandkishore Dukkupati
Tips and Tricks to Better Outcomes	Dr. Jayashree Todkar	Dr Om Tantia
Managing Complications in Bariatric Procedures		Dr Randeep Wadhawan
Patient Selection and Pre- Op Management		Dr Ravikant Kongara
Post- Op Management & Bariatric Nutrition		Dr Sandeep Agarwal
Setting up a Bariatric Unit- Instrumentation & Support		Dr Sanjay Patolia
Advancements in Bariatric Surgery		Dr Sarfraz Baig
Discussion on OSSI Guidelines, The Diabetes Surgery Summit Guidelines		Dr Shivaram H
Panel Discussion-Case Study Discussions- The Way Forward		
Cadaver Workshop		

Registration Fee - Rs. 30,000/-
Residential Package* - Rs. 36,000/-

Hurry up!!!
Limited seats available

Supported By :  ASI The Association of Surgeons of India  IAGES Indian Association of Gastrointestinal Endo Surgeons  AIAARO All India Association for Advancing Research in Obesity  IDA Indian Dietetic Association

XXII IFSO World Congress

22nd WORLD CONGRESS

29 August to 2 September 2017
QEII Centre, London

Organised by:

The British Obesity &
Metabolic Surgery Society

International Federation for the
Surgery of Obesity and Metabolic Disorders

Richard Welbourn
IFSO 2017 Congress
President

We look forward to welcoming you to London for IFSO 2017!

The [22nd World Congress of IFSO](#) will be held in London between the 29th August and the 2nd of September 2017.

The scientific program provides a unique opportunity for all interested in obesity and metabolic surgery to share their experiences, expertise and knowledge and seek practical solutions in their search to eradicate and manage this epidemic. The program highlights the multidisciplinary nature of obesity and its management with joint symposia with anesthetic, plastic surgery, pediatric surgery and internal medicine colleagues. There are planned joint sessions with fertility, psychology and psychiatry experts. There will also be special emphasis on Integrated Health and non-surgical treatment strategies.

The [10 post-graduate courses](#) include the 6th International Conference on Sleeve Gastrectomy. There will be networking lunches organized for integrated health professionals, Young IFSO members and Women in Bariatric Surgery. Meet the expert sessions have also been arranged in the lunch breaks. The regional variations in practice are also recognized with Latin American, European, Asia Pacific, North American and Pan-Arab Symposia. An exciting 'Dragon's Den in the Shark Tank' session will take place where participants will pitch ideas for randomized controlled trials to a panel of experts.

[Register by 1st June to take advantage of Early Bird fees!](#)

XXII IFSO World Congress

Travel and Accommodation

London is a fantastic destination! The conference venue, the Queen Elizabeth II Centre, is located at the heart of London directly opposite to Westminster Abbey and the Houses of Parliament and only a 5-minute walk to the river Thames and the London Eye. The venue is served by outstanding transport links providing great access to everything the city has to offer from hotels and world-class restaurants to culture, museums, shopping and nightlife.

The city is the gateway to the UK with 5 international airports and direct flights from over 140 destinations. [Click here for travel information.](#)

There is a [wide range of accommodation options](#) to suit different budgets. Please make sure

to book your accommodation as soon as possible to benefit from discounted rates at preferred hotels in close proximity of the QEII Centre.

XXII IFSO World Congress

Congress Dinner, Friday 1st September 2017

You are cordially invited to join us for the [Congress Dinner](#) on Friday 1st September, 19:00 - 24:00, for a special evening of networking at the National Maritime Museum, located within the heart of the UNESCO World Heritage site in Greenwich.

We will travel down to Greenwich by boat along the river Thames passing some of London's most famous landmarks, including Big Ben, the London Eye, the Tower of

London, St. Paul's Cathedral and The O2.

A special sit-down dinner will follow in the Neptune Court.

Please note that availability is limited, so we would recommend that you book your place during the registration process. Tickets are £99 + VAT per person.

On behalf of the organizing and the scientific committees and the IFSO President, Dr Kelvin Higa, I would like to welcome you all to the great city of London. For more information, go to www.ifso2017.com

Richard Welbourn,

IFSO 2017 Congress President and Scientific Co-Chair

XXII IFSO World Congress

Important dates for your diaries:

Abstract submission ends: 10 April 2017

Acceptance notification & confirmation of presentation type: 10th May 2017

End of Early Bird Registration: 1st June 2017

6th International Conference on Sleeve Gastrectomy: 29th August – 30th August 2017

Postgraduate Courses: 30th August 2017

Welcome Reception: 30th August 2017 from 18:30

Congress: 31st August – 2nd September 2017

Congress Dinner: 1st September 2017

Our official Journal : *Obesity Surgery*

Scott Shikora
Editor-in-Chief of
Obesity Surgery

The State of Obesity Surgery Journal

Generally speaking, Obesity Surgery is having an excellent year. There have been very few issues with the editorial board, the manuscripts submitted, or the authors.

Manuscript Submissions

Manuscript submission remains very high. Each year the number of submissions has increased. In 2016, over 900 manuscripts were submitted. This year we may see over 1000 manuscripts submitted. While an increased number of submitted manuscripts increases the work load of the Editorial Board, it also enables the journal to be more selective with which article to accept for publication thereby improving the quality of the articles published and the overall quality of the journal.

Impactful IFSO Member Recognition

The first article of each monthly issue has been dedicated to acknowledging the leaders and impactful members of IFSO. Additionally, obituaries of 3 very important members of IFSO who have passed away this year has also been included in this section. The concept is to familiarize the readership about the great achievements made by leaders in the field to the current practice of bariatric and metabolic surgery.

Metabolic Surgery in the Treatment Algorithm for Type 2 Diabetes Statement

Obesity Surgery was given the honor of being able to co-publish with the journals, Diabetes Care, and Surgery for Obesity and Related Diseases, the Metabolic Surgery in the Treatment Algorithm for Type 2 Diabetes Statement. This landmark document was the joint statement of several international diabetes organizations from the 2nd Diabetes Surgery Summit held in London.

Our official Journal : *Obesity Surgery*

Editorial Board

The Editorial Board was recently reviewed and renewed. Some reviewers and editors retired or were retired for poor effort. Some editors and reviewers who have done excellent work were promoted and some new reviewers and editors were added. The goal is to improve the timeliness and quality of the review by evaluating the Editorial Board yearly and removing those who perform poorly and adding/promoting those that do timely and quality reviews. The Editorial Board was also increased in size to accommodate the ever increasing number of manuscript submissions.

Respectfully submitted,

Scott A. Shikora, MD, FACS

Committees' Report

Tracy Martinez
Chair of the
Integrated Health
Committee

Integrated Health Committee

I would like to introduce myself. My name is Tracy Martinez. I am proud and honored to serve as the new chair of the Integrated Health Section of IFSO. I am a registered nurse and the program director at the Wittgrove Bariatric Center in California, USA. I have held this position for nearly twenty years. I was the past president of the ASMBS Integrated Health as well as co-chair of the ASMBS Multidisciplinary Care Committee. I am currently a board member of the Obesity Action Coalition (OAC) which is a nonprofit organization that offers education and advocacy for those affected with obesity. I am delighted to work with our IFSO President Dr Kelvin Higa. Dr Higa is very aware and supportive of the role we play in the pre, peri and post-operative care of patients.

We are getting ready to announce our new Integrated Health Committee Members and a new Chair-elect. Look for these updates and more on our new Integrated Health webpage on the IFSO website. You will find updates, educational articles and member focus. Our first member focus section will feature Mary O'Kane from the UK. Mary is helping coordinate the IH section of our 2017 IFSO meeting in London.

The growth and the strength of the IFSO Integrated Health membership is dependent upon ongoing education, research and communication. This is achieved by developing high quality educational opportunities, standards and policies through individual bariatric country societies and meetings and our IFSO international society and annual congress.

Please send any suggestions or ideas that you have for the Integrated Health committee that can increase membership, expand educational opportunities, provide standards and guidelines. You can reach me at

TMartinezrn@lapbypass.com

I look forward to meeting many of you in London and hopefully receiving an email from you with your ideas on how we can better serve our Integrated Health members.

Tracy Martinez RN, BSN CBN, Integrated Health Chair

Committees' Report

Member Profile: Mary O'Kane
Interviewed by Tracy Martinez

What is your professional background?

I am a consultant dietitian specializing in adult obesity in Leeds Teaching Hospitals NHS Trust. I have worked in Leeds since 1983, initially as a Metabolic Dietitian on the metabolic unit, covering Mineral Metabolism (calcium), obesity and gastroenterology. It was the obesity element that attracted me to the post. Whilst my job role has changed over the years, I have always continued to work clinically in obesity.

My first degree was in Biochemistry/Physiology followed by a postgraduate diploma in dietetics. In 2013, I completed my MSc in Advanced Nutrition. My dissertation was titled "Bariatric surgery, vitamins, minerals and nutritional monitoring: A survey of current practice within British Obesity and Metabolic Surgery Society (BOMSS)". This resulted in the publication of "BOMSS Guidelines on perioperative and postoperative biochemical monitoring and micronutrient replacement for patients undergoing bariatric surgery" a year later.

I have contributed to many national working groups over the years including being a member of the clinical guidelines committee for NICE Obesity (2006 and 2015) and also NHS England Obesity Clinical Reference Group (CRG). As a member of the CRG, I led a working group comprised of highly motivated healthcare professionals (surgeons, physician, nurse, general practitioners and public health) and four patient representatives. Between us, we wrote and published "Guidelines for the follow-up of patients undergoing bariatric surgery" in Clinical Obesity. These cover the whole of the follow-up pathway and propose shared care models to enable patients to have access to long term follow-up. I am a member of the British Obesity and Metabolic Surgery Society and am one of three Allied Health Professionals on the committee.

In 2016, I was awarded Fellow of the British Dietetic Association for my contribution to national work and advancement of dietetic practice.

Committees' Report

What lead you into Bariatric Surgery specialty?

I have always been interested in obesity and so was delighted to have the chance to work on the Metabolic Unit and in the Medical Obesity clinic in Leeds - one of only four in the UK at that time! Obesity surgery was already being performed in Leeds and I started to see patients, supporting them before and after surgery. At that time, there was very little literature regarding the diet or nutritional needs and no internet! I knew one other metabolic dietitian who was working in London and also seeing patients undergoing weight loss surgery. We used to speak on the phone and support each other. I learned alongside my patients. The surgeons started to expand the range of surgical procedures including developing the Meganstrasse and Mill vertical gastropasty, and then moving onto other surgical procedures undertaking the first laparoscopic roux en y gastric bypass and duodenal switch in the UK.

I continued to work in both the medical obesity and surgical obesity services and then approximately ten years ago, we decided to work more as a joint team to enable patients to have a more seamless pathway. I was classed as neutral as I supported patients in both the medical and surgical obesity pathways and so was asked to triage all referrals and lead the multidisciplinary team meetings. I am very fortunate as I have always worked with physicians and surgeons who really value the dietetic role.

Tell us about your responsibilities in your clinic?

I triage all referrals to our medical and obesity services. In the UK, patients going forward for bariatric surgery must spend time in the medical obesity services first. The dietitians, physicians and liaison psychiatry team work closely together in the medical clinic. We assess patients, encourage lifestyle changes and try to optimize comorbidities. For those patients moving forward for surgery, we help prepare them.

I lead the medical and surgical multidisciplinary team meetings and present patients' cases for discussion. Most of the meeting is spent discussing patients who we hope to take forward for surgery. I contact the patient and general practitioner afterwards and let them know the outcome and next steps. We also discuss our more complex cases and it is very interesting to hear everyone's different views.

Committees' Report

After surgery, I see patients in the joint surgical clinic and also more frequently in separate dietetic -led clinics. I support patients with behavior changes and look after their nutritional lab results and adjustment of vitamin and mineral supplements. We are currently commissioned to offer two years follow-up for most patients; however patients with complex needs, especially nutritional, will stay under our care for longer.

What is your favorite part of your job?

Patient contact! It is so rewarding helping to support people moving forward through their weight loss journey, improving their health and overcoming barriers and challenges. I enjoy being a MDT member and have learned so much from working with others. I love the variety of the day from being in clinic, triaging referrals, participating in MDT meetings, training of students and other health care professionals but the patient contact is the most rewarding.

What can you tell us about the upcoming Integrated Health IFSO conference in London this year?

The pre-congress Integrated Health day is aimed at improving the long-term aftercare of patients undergoing bariatric surgery. It will open with a keynote lecture from Prof Batterham on bariatric surgery and its effect on type 2 diabetes. The morning continues with four parallel sessions. These all contain excellent speakers covering a range of topics including shared models of care, clinical outcomes, managing weight regain and maintenance, the role of the bariatric nurse in America, recognizing complications. Attendees will be challenged as to which sessions to attend. Following an opportunity for networking over lunch, all attendees come together for the afternoon session. The afternoon topics include patient support group, managing reactive hypoglycemia, contraception and pregnancy and management of nutritional deficiencies. The IH day will be an excellent introduction to the main conference.

What would you like to see happen as we aim to grow the IH component of IFSO?

IH professionals have a significant contribution to make in assessing and preparing patients for surgery and supporting them afterwards. We need to enable IH professionals to be more confident at sharing practice, participating in research and taking the lead in developing relevant guidelines in their areas of expertise. important for us all to have a wide overview of each other's practice.

Committees' Report

It is important for us all to have a wide overview of each other's practice. Having access to education sessions in which all disciplines (including surgeons) can learn together and be up-skilled should be encouraged. IH professionals often have little access to study leave budgets so even though there are reduced registration fees for IFSO, the cost of travel and accommodation can be prohibitive. It would be good to explore the use of media such as streaming and video links to enable IH professionals to link up and share key presentations. We should consider the development of e-learning modules. We have an active google dietetic group within the UK and it would be interesting to explore using social media for wider networking for IH professionals. We need to encourage patient representation too; this certainly helped on our long-term follow-up guidelines to remember the patient angle.

What would you like the world to know about bariatric surgery in the UK?

We have an excellent professional society –the British Obesity and Metabolic Surgery Society which is a mixture of surgeons, dietitians, nurses, psychologists and physicians who work in the obesity surgery field. The multidisciplinary team work is actively encouraged and reflected in our annual conference with most sessions. BOMSS have set up the National Bariatric Surgery Registry demonstrating the commitment to sharing data and improving patient care. We have National Institute for Health Research supporting the first randomized trial of surgical procedures (gastric band, gastric bypass and sleeve gastrectomy). The SCOT Study is a longitudinal study following all patients undergoing bariatric surgery in Scotland for 10 years. NICE CG189 Obesity recommends bariatric surgery as a treatment option for patients with severe and complex obesity; however we need to make sure that surgery is available to those who will benefit from it.

Tell us about your family and hobbies.

There is a strong Celtic connection as I am from a large Irish family and I married a Welsh man! So in addition to visiting Wales and Ireland regularly, my husband and I enjoy holidays and exploring new places. Being a dietitian, I do enjoy cooking and eating out. To balance that, I swim regularly. I play the violin in the local music center's string group and orchestra – and especially enjoy playing with two of my brothers who play accordion and drums! (They can hide my mistakes!)

Committees' Report

Scientific Committee

The Scientific Committee membership includes Wendy Brown (chair), Miguel Herrera (co-chair), Alex Escalona, Jeff Hamdorf, Scott Shikora, Wei Jei Lee, Prof. Michel Suter, Moshe Rubin, Jacques Himpens and Kelvin Higa.

Wendy Brown

Chair of the
Scientific Committee

The Scientific Committee has been working with the Executive Board to respond to articles in JAMA which questioned the utility of recently published guidelines for Metabolic Surgery (Rubino et al Metabolic Surgery in the Treatment Algorithm for Type 2 Diabetes: A Joint Statement by International Diabetes Organizations. Diabetes Care 2016;39:861-77.).

In addition, we have been working with the local organisers of the London and Dubai scientific congress to assist with strengthening the content. The local organisers have done a superb job and I would encourage everyone to plan on coming to both meetings and attend some of the courses.

We continue to work on updating the scientific content of the Website, and in conjunction with the Communications Committee we are hoping to set up some new initiatives including providing selected scientific readings with expert commentary, as well as providing specific information on the topics that the recent survey undertaken by the Communications Committee identified as being of most importance to IFSO members. These topics included: Procedure for type II DM (63%); Management of weight recidivism after LSG (57%); Management of GERD after LSG (49.5%); Enhanced recovery after Bariatric surgery (30.8%).

We are a relatively new committee and are keen to hear from members who have ideas they would like to see the Scientific Committee tackle, and also those who are willing to help as we progress our new initiatives of providing selected readings and information on those key topics. The more people willing to help – the better the information will be for all our members and ultimately our patients!

Young IFSO News and Activities

Karin Dolezalova
Young IFSO
President

Young IFSO Report

In the past several months Young IFSO (YIFSO) continues to actively participate and cooperate in organising dedicated YIFSO scientific Sessions as well as in delivering talks at Congresses and Meetings worldwide.

There were very well attended, scientifically high level YIFSO Sessions held before the end of the last year at the World IFSO Congress in Brazil and at the Frankfurter Meeting, Germany –(two photos from the meeting are attached).

For this year, YIFSO is taking active part in preparations of a dedicated YIFSO Session at the IFSO-EC Symposium, which is going to be held in Naples, Italy in May 11-13, 2017, as well as to participate at the World Congress of IFSO in London, UK, 29th August – 2nd September 2017.

This year is also important for YIFSO, as its going to be „Presidential“ electoral year. Thus, during the World Congress of IFSO in London, new YIFSO President is going to be inaugurated and the other YIFSOP executive positions are going to be open for voting.

YIFSO is looking forward to welcome participants of the Naples and London meetings at YIFSO Sessions!

Respectfully submitted,

Karin Dolezalova

IFSO Corporate Partners

The Role of Industry Relations

IFSO is proud to partner with some of the medical industry's premier companies, and aims to better facilitate communications and feedback between the Federation, our members and industry professionals. Support from industry professionals helps IFSO further our goal of providing continuing education resources to our members and other bariatric professionals.

IFSO provides appropriate opportunities for communication and exchange of ideas with our members through our conferences, member communications, and other collaborative ventures.

Corporate Committee

The IFSO Corporate Committee is organized to develop and enhance the joint strategies and efforts of bariatric surgeons, healthcare professionals and industry professionals. The Corporate Council offers opportunities to work with industry peers in appropriately influencing the healthcare of the morbidly obese.

IFSO does not endorse any specific commercial product or service. This website has links to private organizations. IFSO Endorsed Meetings

Endorsement requests must be sent to IFSO Secretariat (info@ifso.com) together with the scientific program of the Course. IFSO-Communication Committee will carefully review the concepts and objectives of the course as well as the faculty, the structure and content of the course, in deciding about the endorsement.

“Endorsement” does not in any way offer credentialing of grant approval to the participant regarding future skills and outcomes.

Benefits:

Endorsed events will be:

- listed on IFSO’s Website on the “Endorsed meetings” page, with a link to the congress website
- included on IFSO’s E-newsletter
- mailed twice to IFSO Members
- advertised once on IFSO Facebook page
- the Director may include IFSO’s Endorsement statement and IFSO Logo on promotional materials among the endorsing institutions, exclusively with the following text: “Endorsed by” before the logo of IFSO.

IFSO Related Meetings

25th International Congress

June 14-17, 2017 Frankfurt am Main (Germany)
